## Product features

Parador ClickBoard and decor panels are also impressive in terms of technology. The Safe-Lock profile and process-friendly formats ensure quick and simple assembly with ClickBoard. Using the tongue and groove push-fit assembly or the patented click-in assembly technique makes the assembly of the Parador decor panels equally easy. Different joint versions offer a wide spectrum of design options.

### Suitable for damp rooms

Suitable for bathrooms and kitchens due to HDF/MDF core and moisture-repellent reverse side. Not for use where water splashes.

### Lightfast

Good light fastness in accordance with DIN EN ISO 4892-2 against fading from sunlight.

### Suitable for recessed lights

Suitable for continuous use with recessed lights due to their heat resistance up to 110 °C.

### Safe-Lock®

Patented click mechanism with Safe-Lock® profile: simply put the panels together and securely click them into place.

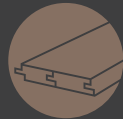

### Tongue and groove push-in assembly

Tongue and groove push-in profile for quick and easy assembly.

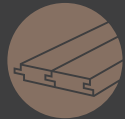

### Click mechanism

Patented click mechanism for quick, easy and safe assembly.

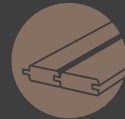

### Jointless

In the case of jointless installation, the panels are joined together without noticeable gaps.

### Design joint

The design joint ensures delicate transitions and exclusive looks.

### Modern 0 cm joint

Modern 0cm joint by means of all-round softline edge. The individual panels are emphasised.

# Art of living meets performance demand

Performance is a permanent feature of our life. Day after day, performance is demanded from us. Delivering performance on a daily basis requires solid ground beneath our feet. For us, the art of living is an appreciation of beauty and to create inspiration out of it at any moment in time.

Parador not only gives floors exclusive furnishing. Sophisticated products for wall and ceiling also keep the Parador range at a high level. Parador ClickBoard and Parador decor panels turn wall and ceiling areas from architectural necessities into expressive elements showing an individual interior style. Personal creative intentions know no boundaries in this respect. With a variety of different decors and textures, Parador also provides the right product for wall and ceiling to suit any room and any style.

### What we value

As a wood processing company, we are aware of our particular responsibility for the environment and towards handling natural resources in a sustainable manner. That is why we opted in 2004 for certification according to the two best-known systems for sustainable forestry, the FSC® and PEFC. This documents how responsible we are when dealing with the valuable material that is wood. The wood and wood materials processed come from sustainably managed forests and monitored sources of supply. We feed wood waste back into biomass thermal power stations, thus generating renewable energy. In the production of our laminate floors and panels, only organic dyes are used for printing the decor papers. Our products are regularly tested by independent institutes for their environmental impact and have been found to be good, meaning that we can apply the "Blue Angel" seal of approval among others. In order to meet our high ecological and quality standards, we develop and produce exclusively in Germany and Austria, thus ensuring that our products meet your and our high standards in terms of quality and sustainability. This also applies to our new vinyl range, which is not only distinguished by the sensitive purchase of relevant raw materials, but is also allowed to bear the "made in Germany" label of origin.

# ClickBoard

Parador ClickBoard is the perfect choice for decorating walls, ceilings and pitched roofs over large areas or to make a statement on individual areas. With attractive decors and various surface textures, Parador ClickBoard provides the right look, from classic to modern, for every taste and design need. Simple handling is assured by installation-friendly formats, which are especially designed for the different application areas, namely wall, ceiling and loft extension. Parador ClickBoard is lightfast, resistant to damp and suitable for continuous use with recessed lights due to their heat resistance. Thanks to the patented click mechanism with its Safe-Lock profile, ClickBoard can be worked quickly, without complications and almost without joints. Furthermore, ClickBoard can easily be painted or wallpapered.

1. Ceiling

2. Loft extension

3. Facing formwork

4. Lightweight partition wall

## ClickBoard

- › 12 mm panel thickness
- › scratch-resistant and easy to clean surfaces
- › almost invisible joints
- › available in three different formats
- › excellent HDF board stability

# Decor Panels

Parador decor panels give walls and ceilings an individual, exclusive character. The spectrum of decors ranges from perfect wood imitations through to extravagant, graphic patterns, leaving no creative needs unfulfilled. Different widths from 165 to 272 mm and various joint designs further add to the range of ways to individually express yourself. Parador decors are lightfast and suitable for damp rooms. The patented click mechanism makes installation quick, easy and safe.

## Surface design

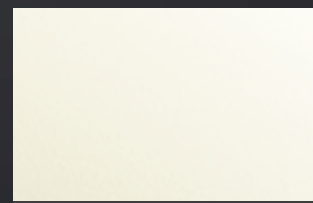

### ClickBoard

Besides a large number of decors, Parador panels are impressive due to their variety of surface textures, which combined with the decor reinforce their authentic effect.

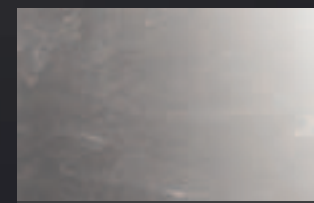

Fibre plaster

The medium rough surface has the same look and feel of a fibre plastered wall.

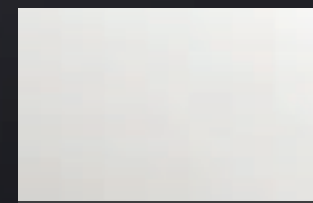

Fine plaster

With its fine, slightly rough surface, this texture can barely be distinguished from genuine fine plaster.

Satin finish

With its characteristic look of oiled real wood, the oil texture underlines the authenticity of the wood decor.

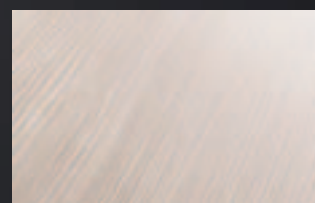

Primed

The primed texture is ideally suited for being individually finished by painting or wallpapering.

### Decor panels

In addition to completely smooth surfaces, there are Parador decor panel surfaces with a special feel and optical relief effect.

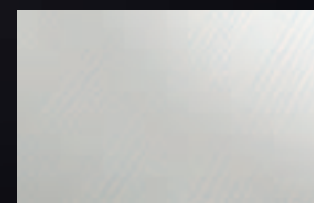

Pine Light brushed

The texture of this decor adds to the authentic wood look with the tangible effect of a brushed surface.

Silhouette gloss

Thanks to alternating matt and shiny stripes, this decor texture is given a three-dimensional relief effect.

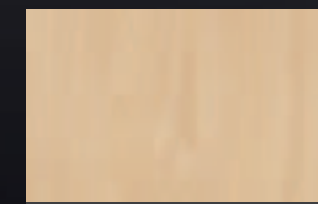

Stripes White

Light and darker parallel stripes generate an optical interaction with a surface that can be felt.

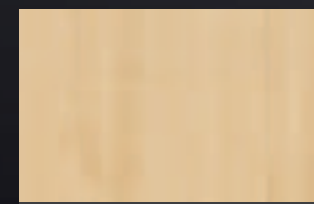

## Joint pattern

Besides the decor, texture and format, the joint pattern also determines the characteristic look of Parador ClickBoard and decor panels. Thanks to the patented click mechanism with its Safe-Lock profile, ClickBoard can be worked quickly, without complications and almost without joints. For Parador decor panels there are two different joint looks: Basic 10, RapidoClick and MilanoClick have a delicate design joint, which discreetly emphasises the exclusivity of the individual panels. The modern 0cm joint on Novara makes the transitions between the panels stand out more clearly, thus structuring them in the surface.

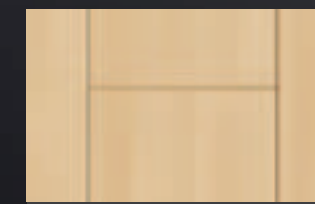

Jointless

With the almost jointless installation, the panels fit together without detectable gaps.

Design joint

The design joint ensures delicate transitions and exclusive looks.

Modern 0 cm joint

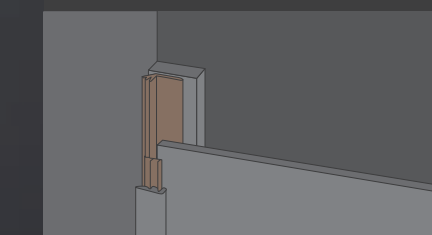

Modern 0cm joint by means of all-round softline edge. The individual panels are emphasised.

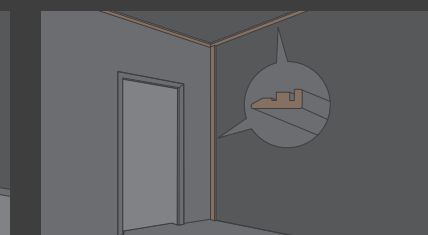

## Accessories

### ClickBoard

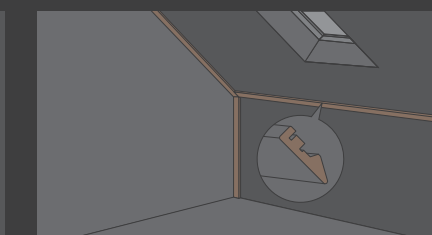

#### HDF profile system

Fastening rail

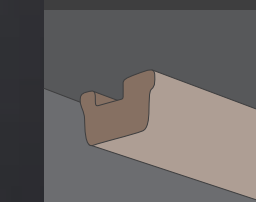

End profile

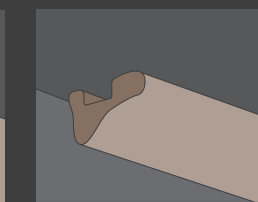

Universal profile

### Decor Panels

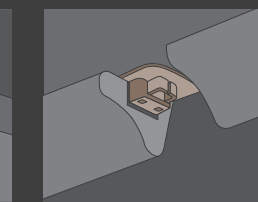

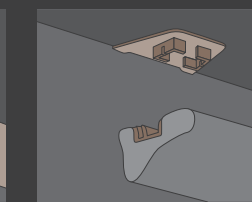

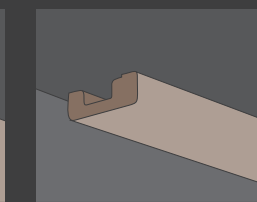

#### Ceiling profiles

DAL 1

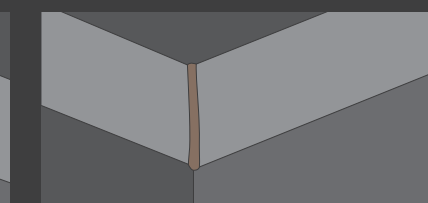

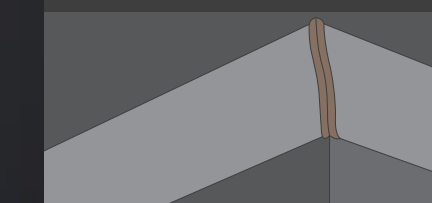

DAL 2

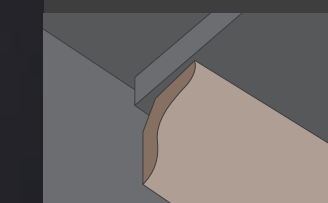

Quickly and simply fitted. Patented profile clips for ceilings and DAL 1 and DAL 2 end profiles

#### External and internal corners for ceiling end profiles

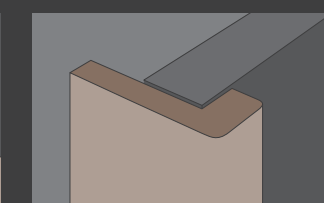

External and internal corners for ceiling end profiles DAL 1, DAL 2. In a choice of white, aluminium or gold look

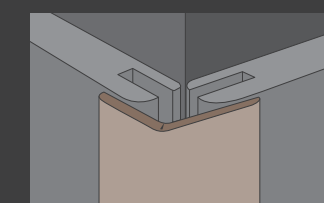

#### Special profiles for ceiling, wall and loft extension

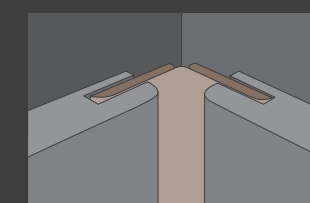

Concave HKL  
Classic ceiling end profile without clip

Rebate moulding FL 1  
For covering the substructure on walls and ceilings that are not fully clad

Flexible moulding FAL  
Foldable moulding for neat transitions on non-rightangled connections

Flexible moulding FAL  
Folded inwards for covering the transitions on dormer windows and pitched roofs
